

# #1 Cost-Effective **NAS/File Share Backup** for Businesses and MSPs

## Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs,  
SaaS, DBs/Applications, NAS/File Share

## Store Backup Anywhere

On-Premise/Remote Storage,  
Your Own Public Cloud, BDRCloud

## Centralized Management

BDRCloud-Hosted (or) BDRSuite's  
Self Hosted Management Console

## BDRSuite for NAS/File Share Backup & Recovery

BDRSuite provides an all-inclusive backup and recovery solution to safeguard data on your NAS devices & File Shares. BDRSuite is well-suited for businesses managing shared network storage, handling frequent data changes, and requiring efficient and reliable data recovery capabilities. BDRSuite addresses challenges such as data loss, minimizing downtime and ensuring data integrity, making it ideal for MSPs and businesses.

## Key Features

### File-Level Backup

Backup the critical files and folders on your NAS & File Shares, ensuring comprehensive data protection.

### Incremental Backup

Backup only the changes since the last backup, reducing storage requirements and enhancing backup efficiency.

## Direct-to-Cloud Backups

### BDRCloud

Utilize our reliable & secure BDRCloud Storage

### Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi  
Backblaze | MinIO | Other S3 Compatible Storage

### On-Premise and Cloud Storage

Store your backup data locally or in the cloud or on both, providing flexibility to meet different storage and recovery needs.

### File Level Recovery

Quickly recover individual files or folders to either their original location or an alternate location, providing flexibility and convenience in the restoration process.

## Automatic Backup Scheduling

Schedule backups to run every 15 minutes, hourly, daily, weekly, or monthly, ensuring consistent data protection.

## Data Retention & Compliance

Retain data for as long as necessary, whether days, weeks, months, or years, and ensure compliance with regulations like HIPAA, GDPR, and SOC 2.

## Ransomware Protection & Recovery

Protect your data against ransomware with immutable backups and quickly recover in the event of an attack.

## Backup Encryption

Backup data is encrypted to protect it from unauthorized access both during transmission and while at rest, ensuring compliance with security policies and regulations.

## Remote Backup

Securely backup virtual machines across any network and from any location, offering flexibility and ensuring data protection even for remote sites.

## Pre/Post Backup Scripts

Automate custom tasks by running scripts before or after the backup process. This feature allows for greater flexibility and customization in managing your backup workflows.

## Where-it-left-off

Backups interrupted due to network or other reasons, will resume from where-it-left-off, minimizing downtime and data transfer redundancies.

**Highly Rated**  
Backup Solution by Customers,  
MSPs, Channel Partners

“ We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.
