Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRCloud

Centralized Management

BDRCloud-Hosted (or) BDRSuite's Self Hosted Management Console

BDRSuite for Microsoft 365

BDRSuite provides a robust, cost-effective backup and recovery solution designed to protect critical data across Microsoft 365 applications. Ensure your organization's data is safeguarded, easily recoverable, and compliant with regulatory requirements.

Supported Platforms

Exchange Online | SharePoint Online
OneDrive for Business | Microsoft Teams

Direct-to-Cloud Backups

BDRCloud

Utilize our reliable & secure BDRCloud Storage

Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi
Backblaze | MinIO | Other S3 Compatible Storage

Key Features

Exchange Online Backup

Back up emails, contacts, calendars, tasks, archive, ensuring complete protection for user mailbox.

SharePoint Online Backup

Safeguard site collections, libraries, lists, and documents to protect collaborative content and site configurations.

OneDrive for Business Backup

Protect user files and folders stored in OneDrive, ensuring that personal and shared data is recoverable.

Microsoft Teams Backup

Backup team channels, conversations, files, and settings to preserve collaboration data.

Granular Recovery

Restore individual items such as emails, files, folders, and site content without needing to recover the entire dataset.

Automated Backup Scheduling

Set up automated backup schedules at regular intervals (daily, weekly, etc.) to ensure continuous data protection without manual intervention.

Advanced Search & Restore

Utilize powerful search capabilities to quickly locate and restore specific items, emails, or files from your backups.

Compliance & Retention

Configure retention policies to meet regulatory compliance requirements (e.g., GDPR, HIPAA) and ensure data is retained according to your organizational needs.

Centralized Management Console

Manage and monitor all Microsoft 365 backups from a single, user-friendly console, simplifying administration and improving oversight.

End-to-End Encryption

Protect your backup data with AES-256 bit encryption during transfer and at rest, ensuring robust data security and privacy.

Store Backup Anywhere

Store backup data in NAS, DAS, SAN, BDRCloud, Amazon S3, Azure Blob, Google Cloud, Wasabi, Backblaze B2, MinIO or other S3 Compatible storage.

Ransomware Protection & Recovery

Defend against ransomware threats with immutable backups and rapid recovery options to minimize the impact of attacks.

Reports

Receive detailed reports on backup and restore activities, including user statistics, backup size, and duration.

What Makes BDRSuite
Stand Out from Other Backup Solutions

- Cost-Effectiveness – Significant savings compared to competitors
- 24/7 Responsive Technical Support
- Ease of Use and Management with minimal learning curve

> *We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.*
