BDRSuite
Backup | DR | Ransomware Defense
by Vembu

#1 Cost-Effective Backup for MSPs and Businesses

Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRCloud

Centralized Management

BDRCloud-Hosted (or) BDRSuite's Self Hosted Management Console

BDRSuite Overview

BDRSuite by Vembu is a comprehensive and cost-effective backup and disaster recovery solution designed to backup diverse IT workloads from any location, including VMware, Hyper-V, KVM, Proxmox VE, oVirt, Windows, Linux, Mac, Microsoft 365, Google Workspace, AWS, Azure, NAS/File Shares, Microsoft Exchange Server, SQL Server, SharePoint, PostgreSQL, MySQL.

You can store backup anywhere - DAS, NAS, SAN, Your own Public Cloud - S3, Azure, Google, Wasabi, Backblaze, MinIO, other S3 compatible storage, and BDRCloud. With BDRSuite self-hosted management console, you can centrally manage the entire backup infrastructure and quickly recover from data loss or ransomware attacks—all at an affordable price.

Direct-to-Cloud Backups

BDRCloud

Utilize our reliable & secure BDRCloud Storage

Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi Backblaze | MinIO | Other S3 Compatible Storage

Key Features

VMware Backup & Recovery

Comprehensive data protection for VMware VMs on ESXi & vCenter with agentless backup and instant recovery options.

Hyper-V Backup & Recovery

Agentless backup for Microsoft Hyper-V VMs on standalone host, Cluster, CSV, SMB, S2D, ensuring seamless data protection and rapid recovery.

KVM Backup & Recovery

Secure and efficient agentless backup solutions for KVM environments, ensuring critical virtual machines are always protected and easily recoverable.

Proxmox VE Backup & Recovery

Protect your Proxmox VE virtual machines with agentless backup and instant recovery options, minimizing downtime and ensuring data integrity.

oVirt Backup & Recovery

Backup and recovery for oVirt VMs, providing complete data protection and quick recovery in case of any failures.

Server Backup & Recovery

Backup Windows and Linux servers with Disk-Image/File-level backups, ensuring data protection & bare-metal restore.

Endpoint Backup & Recovery

Backup Windows, Mac, and Linux endpoints, providing comprehensive protection for all user devices.

Microsoft 365 Backup & Recovery

Backup Exchange Online, OneDrive, SharePoint Online, Teams, Group Mailbox, allowing for granular and cross-user restore.

Google Workspace Backup & Recovery

Backup Gmail, Contacts, Calendars, Google Drive, Shared Drive, ensuring your data is always protected and restorable.

NAS Backup & Recovery

Protect your NAS devices and file shares, ensuring critical data is securely stored and quickly recoverable.
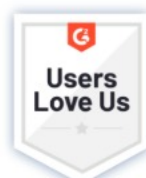

Database/Application Backup & Recovery

Backup and restore DBs/Apps such as Microsoft Exchange, SQL Server, SharePoint, PostgreSQL & MySQL.

VM Replication

Ensure high availability with VM replication for VMware & Hyper-V VMs, providing quick failover & failback.

What Makes BDRSuite
Stand Out from Other Backup Solutions

› **Cost-Effectiveness – Significant savings compared to competitors**

› **24/7 Responsive Technical Support**

› **Ease of Use and Management with minimal learning curve**

› **Quick Setup and deployment**

› **No edition complexities. One edition for all backup needs**

Backup Simplified with
Zero Hardware Investment

› **BDRCloud-hosted Centralized Management Console**

› **Fully Managed in BDRCloud**

› **No Hardware Investment Required**

› **Cut Local Infrastructure Costs**

› **Quick and Simple Setup**

› **Automatic Upgrades & Maintenance**

› **Accessible From Anywhere, Anytime**

› **Scalable for Any Client Size**

› **Store backup on BDRCloud Storage or on your own Private/Public Cloud or On-premise storage (NAS, SAN)**

Ransomware Protection

Robust ransomware protection with Immutable backups, ensuring data remains secure and recoverable.

Disaster Recovery

Create multiple backup copies and store on different storage targets & locations like remote/offsite data center or BDRCloud or Tape Drives

crozdesk TRUSTED VENDOR HIGH MARKET PRESENCE 2024

We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.
